Importer of Danish Seeds
LIMA, NEW YORK

Danish Grown Cabbage and Cauliflower Seeds

The best strains of Cabbage and Cauliflower SEEDS are grown in DENMARK. This small country is located as far north as the southern part of Alaska Territory. That is why DANISH SEEDS are free from disease. The outstanding demand for Danish grown Cabbage SEED all over the world proves that it is superior to all other strains of seeds.

It is a well known fact that some American growers and dealers sell Danish grown cabbage seed for American grown seed, "Why"? better seed larger profits.

High grade Danish grown seeds planted in American soil are producing some of the largest yields of Cabbage and Cauliflower. By careful and constant trials and follow-up investigations we are constantly increasing the yields and the quality of the strains.

M. Klitgord was born in Denmark and knows the best and most careful seed growers, and has an agreement with them, whereby they will at all times send him the best of the seed grown each year.

For the seed-growing firms it is necessary not to stop upon the ground gained, but to work ahead and keep on improving the strains in order that these may always be on the level with the best obtainable.

My growers are always working thoroughly on such improvements. Our work has been successful. In our trial grounds we are every year carrying out numerous comparative trials, not only with our own varieties and strains, but we are also trying to procure seeds from novelties, both Danish and foreign varieties and strains, in order to know them, compare them to our own and thereby always be up-to-date. In this way our customers have the very best warranty that we are always delivering the best seed of the most productive varieties and strains.

All my Cabbage and Cauliflower SEEDS are HOT WATER TREATED, as a preventive measure against BLACK LEG AND OTHER DISEASES in the soil. According to Bulletin No. 550 New York State Agricultural Experiment Station, Geneva, N. Y.

"DANISH grown seeds do not carry
Black Leg Disease"

Untreated seed can be supplied if you so desire.

CAULIFLOWER

EARLY SNOWBALL SELECTED. This strain is known as the standard Snowball, a splendid variety for early outdoor use, as well as forcing in frames, it is also good for fall planting. Call for my Snowball and you get the earliest, most dwarf, surest header and snow-white Cauliflower.

EARLY DWARF ERFURT. An excellent sort very similar to the Snowball, but a little later. One of the best for general cultivation.

DRY WEATHER. Second early, extra large, compact, pure white heads, tall foliage protecting from unfavorable weather conditions. The best variety to use in localities subject to dry, warm seasons.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Early Snowball	\$1.50	\$6.00	\$20.00
Early Dwarf Erfurt	1.50	5.00	18.00
Dry Weather	1.50	5.00	19.00

CABBAGE

BEST EARLY AND SECOND EARLY CABBAGE WITH ROUND HEADS

GOLDEN ACRE. Quite similar to the popular Copenhagen Market, but smaller and earlier. A uniform, tightly folded, and well-blanced head of superb quality.

Oz.	$\frac{1}{4}$ Lb.	Lb.
50c	\$1.40	\$3.50

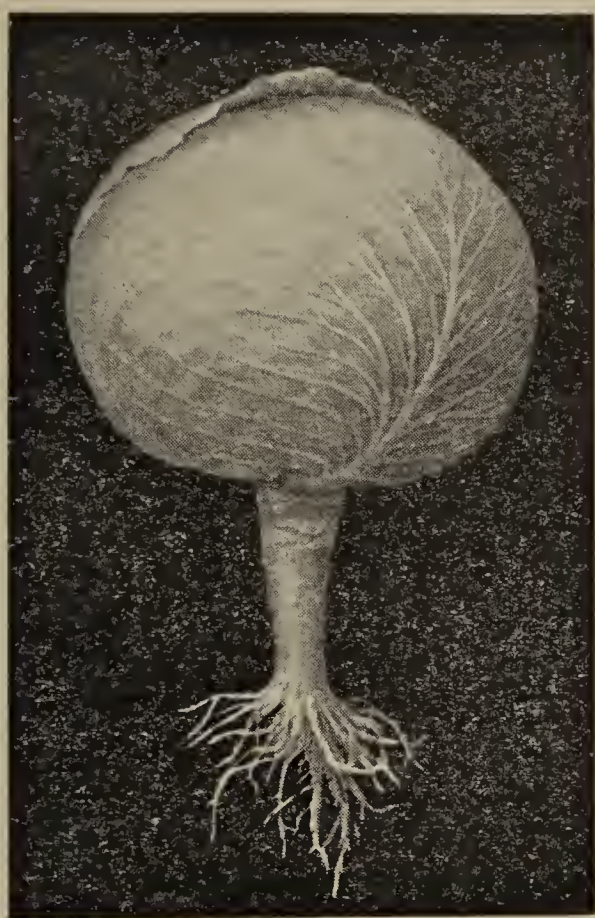

A field of Extra Early Round, grown from
Klitgord imported seed

EXTRA EARLY ROUND. This new cabbage is very early, heads are solid as a rock, weight from 5 to 8 lbs. It is surely the earliest of all Round Cabbage, and will stand long after being ready to cut without splitting. Give Extra Early Round a trial for your first early crop. Some of my customers have grown this cabbage in 60 days for car-load shipments as early as Aug. 2nd. None earlier, none better.

Oz.	$\frac{1}{4}$ Lb.	Lb.
35c	\$1.25	\$3.00

EARLY EXPRESS. Very early and uniform. The heads are well closed, and have but few outer leaves, a good yielder.

Oz.	$\frac{1}{4}$ Lb.	Lb.
35c	\$1.25	\$3.00

COPENHAGEN. A quality variety with round heads averaging about 8 lbs. in weight. They are very solid and have a small core. The plants are short-stemmed, the heads being produced almost on the surface of the ground. It is ready for market fully as soon as Early Jersey Wakefield, and gives a heavier yield per acre than that popular cabbage. A most productive variety, attractive, and always tightly folded.

This strain is one of the most popular Copenhagen Cabbage in N. Y. State.

Oz.	¼ Lb.	Lb.
30c	\$1.00	\$2.75

GLORY OF ENKHOUSEN. A second early, sure-heading variety of large, solid heads. A compact grower allowing close planting. Especially desirable for market growers to set out in July after the early spring crops are harvested. This strain of Glory is a very heavy yielder, customers often reporting yields of 30 tons to the acre, and is one of the most popular cabbage used for Kraut making in N. Y. State.

Oz.	¼ Lb.	Lb.
25c	\$1.00	\$2.50
(5 lbs. for \$12.00)		

The farmer at the left claims this is the finest crop of **Glory of Enkhousen** he ever raised and he attributes it to the quality of Klitgord seed. Mr. Klitgord, who is always interested in the results obtained by his customers, may be seen at the right.

MID SEASON

Heads are almost round, very large and uniform type. One of the heaviest yielding kraut cabbage.

\$2.50 per pound

ALL HEAD EARLY

Heads are very solid. Good for kraut.

\$2.35 per pound

ALL SEASONS

This cabbage is a favorite with all kraut makers.

\$2.35 per pound

SUCCESSION

Heads large and somewhat flat. A good short stemmed second early.

\$2.35 per pound

Buy only Seeds of Quality with high GERMINATION of the HEAVIEST YIELDING STRAINS from **Klitgord's** Selected Danish Grown and hot water treated Cabbage seed.

PLEASE ORDER EARLY.

Oaks Corners, N. Y., Jan. 6, 1933

Dear Sir:

Last year we had 46 acres by actual measurements of cabbage from your seed. The Copenhagen cabbage was early, good quality and produced 15 tons per acre. The Glory was a fine Kraut cabbage and produced over 20 tons per acre.

Yours truly,
McIvor Kraut Co.

WINTER CABBAGE

MY DANISH SELECTED SHORT STEM. This selected strain produces a large round solid head, of extra good quality, the outer leaves having a purple tint, the small veins showing a very rich color. This is an extra fine strain, and the produce dealers' favorite cabbage. I have a private grower in Denmark, that grows only a limited amount of this seed each year. This strain will yield more tons of cabbage per acre, than any other strain; without exception.

Oz.	¼ Lb.	Lb.
40c	\$1.00	\$3.00
5 lbs. for \$14.00		

DANISH ROUND HEAD. This strain produces large, solid, almost perfectly round heads of the same keeping qualities as the famous Danish Ball Head. It is about 10 days or 2 weeks earlier in maturing and is one of the very heaviest yielders. A fine strain for shipping in late fall.

Oz.	¼ Lb.	Lb.
25c	\$1.00	\$2.75
(5 lbs. \$13.25)		

RED CABBAGE

MAMMOTH RED ROCK. This is the largest strain, and one of the best of the red commercial varieties, the seed offered you will produce fine large solid heads, and has an attractive deep red color.

Oz.	¼ Lb.	Lb.
25c	\$1.00	\$3.00

RED DANISH STONE HEAD. This strain of late red cabbage, originated in Denmark, is considered one of the best cabbages introduced. The plants are strong and compact, producing dark red, round, solid heads. The red color extends through to the center of the head. Valuable for home garden, market or picking.

Oz.	¼ Lb.	Lb.
25c	\$1.00	\$3.00

Red Cabbage should be set out before the middle of June, as they need a little longer time for maturing than the white cabbage. Use 800 lbs. of 4-8 and 12 fertilizer per acre.

Suggestions to Growers of Cabbage

For seed bed use good rich soil free from disease, when seed bed is well worked down and dry, use a small seed drill, sow the seed shallow and not too thick. One pound of seed will produce plants for three acres, for each pound of cabbage seed use about 75 lbs. of 2-10-4 fertilizer. Do not use chicken manure for seed bed.

Before setting out the plants use plenty of manure, or a high grade fertilizer 700 to 1000 pounds per acre, work the land well before setting out the plants, cultivate frequently. Early setting of the plants gives the crop time to mature, and a larger yield.

Set plants about 20 inches in the row and the rows 34 inches apart.
